**Panama City, Fla.—** Bay County received confirmation of seven additional cases of COVID-19, the novel coronavirus. The persons ill with the virus are a 54-year-old male, a 64-year-old female, a 39-year-old female, a 52-year-old female, a 30-year-old male, a 31-year-old male, and a 21-year-old female. All are Bay County residents. This brings Bay County's total COVID-19 cases to 55, including 54 residents and one non-resident.

The Florida Department of Health in Bay County (DOH-Bay) is now conducting its contact investigation and working on identifying and notifying individuals who will need to self-monitor for symptoms for a 14-day period. Contact investigations are a critical way for staff epidemiologists to track and prevent the spread of disease.

There are two deaths in Bay County from COVID-19. The total hospitalizations count is at eight including seven residents and one non-resident. The total COVID-19 tests processed is at 832 tests with 776 negative results with a seven-percent positive rate. The addresses of the 54 positive Bay County residents include; 30 in Panama City, 12 in Panama City Beach, one in Southport, five in Lynn Haven, one in Parker, three in Youngstown, one in Tyndall Air Force Base, and one in Callaway. The non-resident case is from Texas.

Age, gender, race, and ethnicity data is available on the dashboard. Zip code level case range numbers are also available. The dashboard is updated twice daily around 10:30 am and 5:30 pm. Visit <https://experience.arcgis.com/experience/96dd742462124fa0b38ddedb9b25e429> for details.

**COVID-19 symptoms and treatment**

The symptoms of COVID-19 can mirror illnesses such as influenza. Patients with COVID-19 typically display symptoms such as fever (100.4°F or higher), cough, and/or shortness of breath within 2 to 14 days of exposure to the virus. Approximately 80% of those affected with COVID-19 report mild to moderate illness and experience a complete recovery. Some experience more severe illness. People who are more vulnerable to the illness include individuals who are over age 65 with underlying health conditions, immunocompromised, ill or have underlying chronic health conditions, such as heart disease or diabetes.

Many cases of COVID-19 can be managed at home by treating symptoms, and this is encouraged. However, if you develop worsening symptoms, such as shortness of breath, chest pain, or inability to drink fluids, contact 911 and advise them of your symptoms as you may need treatment at a hospital.

## **COVID-19 overview, symptoms, and general prevention**

COVID-19 is a new type of coronavirus; coronaviruses are a large family of viruses, some causing illness in people and others that circulate among animals. Other coronaviruses include the common cold and Severe Acute Respiratory Syndrome (SARS). COVID-19 is believed to have emerged from an animal source and is now capable of spreading from person-to-person. There is currently no vaccine to prevent COVID-19.
